

Company Overview

Renovo Solutions was formed in response to the growing need for improved capabilities in clinical equipment service management. Our health-care technology management programs help reduce costs, increase quality and improve equipment performance in health-care facilities nationwide. We offer unbiased technology assessment and capital planning programs developed from first-hand experience with emerging products and procedures.

Latin for renew, Renovo exemplifies our mission to reinvent the concept of medical equipment management by providing comprehensive solutions that help customers reduce costs and increase quality and equipment performance.

Senior Management Team

Sandy D. Morford, CEO

Sandy Morford joined Renovo Solutions with more than 30 years experience in leading health-care service organizations. Recognized as an industry leader with extensive experience in executive management, Sandy's strengths include business development, operations management, sales and marketing. Sandy is a Certified Clinical Engineer, has a BS degree in Biomedical Engineering from the University of Southern California and an MBA from Pepperdine University.

Haresh S. Satiani, COO

Haresh Satiani joined Renovo Solutions with nearly 30 years professional experience in the health-care service industry. Haresh is skilled in organizational management and has been instrumental in growing several different independent service organizations. Haresh holds a Master's degree in Clinical Engineering from Ohio State University.

Joseph A. Happ, MHA, Executive Vice President

Joe Happ joined Renovo Solutions with 30 years professional experience in the areas of clinical engineering, facility services, information technology, management and organizational development. Joe holds a Master of Science degree in health-care administration from Central Michigan University.

Donald K. Carson, Executive Vice President

Don Carson joined Renovo Solutions with 30 years experience in the health-care industry and is considered a national authority on health-care technology management. He is recognized for his ability to manage others and his focus on superior employment and business practices. Don received his training at Park University and the United States Air Force.
